

The Four Steps to Stormwater Proofing your Dumpster

01

COVER

Place dumpsters under a covered area to prevent rain from getting inside.

02

CLEAN

Sweep the area around your dumpster with a broom and dispose of debris properly. Do not wash into a drain.

03

CLOSE

Keep the lids closed at all times to keep rain out and garbage in. Contact your hauler to repair or replace damaged or missing lids.

04

CONTAIN

Contain spills immediately. Have a spill kit available and make sure employees know how to use it.
